iTrax version 8 is now available!

The iTrax version 8 has made significant changes and improvement in features and functions. The major change is item-category central. You can now define different settings and behaves on each and every type of items in iTrax database. Other exciting features are such as email message notification, item reservation, reference lookup tables and staged item disposal processing.

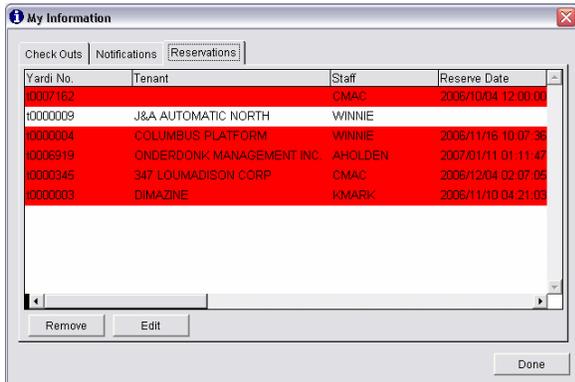

What's New in iTrax version 8

1. **Dramatic enhancement in category handling:** Handle different categories of items with distinct settings, regulations and attribute naming conventions.
2. **Subcategories** items with their associated "owners"
3. **Functions and behaviors driven by item category:** vocabulary, main interface display, return due dates, label information, disposal methods and schedules
4. **Parent-child relationships:** establish master-sub links between items.
5. **Email notification:** enable email notification on item overdue, item availability and system-wide administrative message.
6. **Reservation:** reserve your item and let the system notify you when it becomes available
7. **Enhanced label printing:** print labels using regular laser printer; use standard Avery label formats.
8. **New bar code fonts:** allow higher density of bar codes; accommodate more characters for bar codes; allow lower-case characters and other symbols in the bar codes.
9. **Staged item disposal processing:** disposing an item can be staged with user defined time frames; guided process;
10. **Reference lookups:** The new version has added a number of reference lookup tables including item owner group, system users (clients), category, document types, disposal schedules and notifications.
11. **Client reference table:** The Client table keeps detailed information on the system users and gives easy view of outstanding checkouts for each Client.
12. **Digital document link and view:** This feature allows each item associates with multiple electronic documents and

images that are managed outside of *iTrax*. You can view the documents within iTrax application

13. **My Information View:** This is a new feature that allows you to view important current issues such as outstanding checkouts, active reservations and notifications.

The screenshot shows a window titled "My Information" with three tabs: "Check Outs", "Notifications", and "Reservations". The "Reservations" tab is active, displaying a table with the following data:

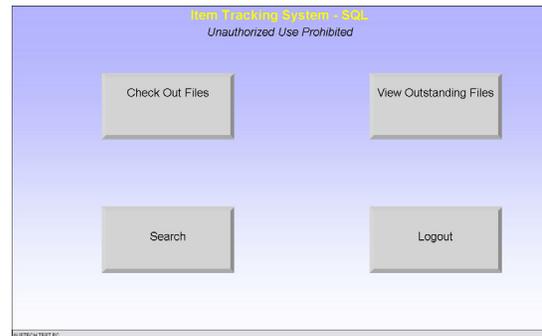

Yardi No.	Tenant	Staff	Reserve Date
0007162		CMAC	2006/10/04 12:00:00
10000009	J&A AUTOMATIC NORTH	WINNIE	
0000004	COLUMBUS PLATFORM	WINNIE	2006/11/16 10:07:36
0006919	ONDERDONK MANAGEMENT INC.	AHOLDEN	2007/01/11 01:11:47
0000345	347 LOUMADISON CORP.	CMAC	2006/12/04 02:07:05
0000003	DIMAZINE	KMARK	2006/11/10 04:21:03

At the bottom of the window, there are "Remove" and "Edit" buttons, and a "Done" button at the very bottom right.

14. **Security enhancement:** Force user password change for enhanced security access.
15. **Association between the application users and Client users:** The iTrax users may also be the Clients to whom the items are checked out to. Association between the two helps

synchronize the login and checkout process.

16. **Enhanced audit trail:** you now have the ability to track detailed change history on each and every item records.
17. **New Alternated User Interface:** a program specially designed for kiosk checkout counter. This program takes advantage of touch screen monitor and bar code scanning for easy, fast and accurate checkout.

18. **Checkout audit:** using the portable PDA, you can audit and validate the items that were found on the user's location.
