

ATS is the most comprehensive system on the market for tracking and managing fixed assets. It features a powerful database engine, integrated support for bar coding and handheld scanners and a familiar, easy-to-use Windows™ interface.

ATS, uniquely designed with today's business dynamics in mind, provides unparalleled functionality, robustness and flexibility. It greatly enhances your organization's productivity, efficiency, and helps you track and manage your assets with ease.

ATS can be used for a multitude of different applications; virtually any enterprise with valuables that need to be tracked – organizations with IT assets, utility companies with valuable equipment, manufacturers with large numbers of tools and machinery, military organizations with mission-critical items – can benefit from using **ATS**

WHAT TYPE OF ASSETS ATS TRACKS

The types of assets **ATS** can track are countless, to just name a few:

- Computers and computer-related equipment
- Insured valuable items
- Shipping containers or medical equipment
- Tools and machinery
- Mobile devices such as cell phones and pagers
- Furniture or fixtures

WHAT ATS DOES

Asset Assignment and Return

When an asset item is assigned out or returned, **ATS** registers and keeps track of relevant information, such as location, custodian or return condition.

Asset Maintenance and Service

ATS records and tracks information on asset service or maintenance schedules, helping you to keep valuable assets in top condition.

Single View of Complete Statistics

As the central source of information on your organization's assets, **ATS** provides vital information and audit trail throughout the life cycle of an asset.

Wireless Data Collection

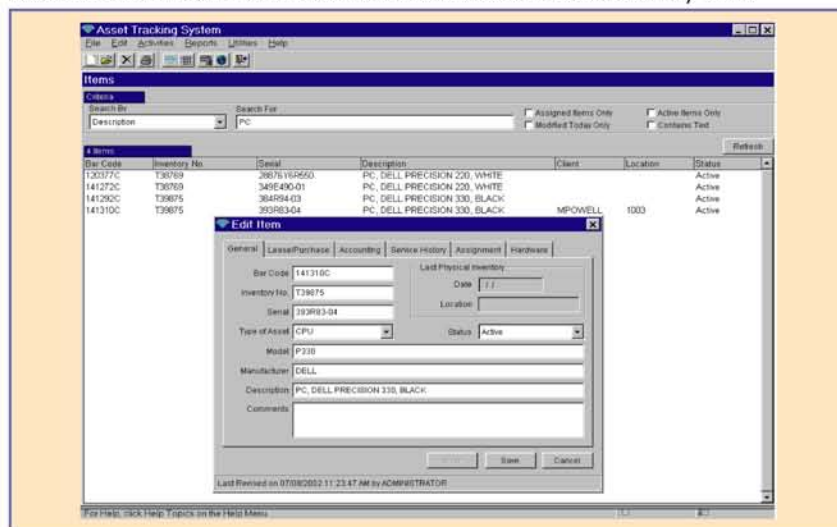

The flexibility and convenience of wireless data collection makes tracking your mobile assets effortless.

ATS BENEFITS

- Total control and tracking of assets assigned or leased
- Central source of and single view at asset information
- Accurate reporting for accounting or insurance purposes
- Instant and up-to-date information on an asset's location
- Increased employee accountability
- Loss prevention
- Simplified office or departmental moves
- Smooth and flawless physical inventory

Asset record screen - Asset records main view and record entry form

ATS FUNCTIONALITY

Feature-Rich and Powerful

- Easily register assignments and returns
- Track location and transaction history
- Track asset service and preventive maintenance history
- Make powerful and comprehensive searches and queries
- Attach images to asset records and view them online when needed
- Define custom-tailored access permissions for every user of the system

Ease of Set-up and Use

- Import data from an Excel file for initial database population
- Export data to a variety of file formats
- Familiar, intuitive Windows interface

Flexibility and Custom Configuration

- Configure the system to use terminology specific to your organization
- Customize the interface to display asset information you need
- Customize the program's behaviour to suit your business processes
- Add custom fields and track the information

Powerful Reporting Tools

- Generate powerful reports using built-in Seagate Crystal Reports™
- Output reports to printer, email or a variety of file formats
- Define and generate your own reports

Wireless Data Collection

- Use handheld scanners for asset assignments, servicing and physical audits
- Reduce errors and increase efficiency by bar coding
